

We are part of the family

After watching the animation, everyone can understand that every family member can contribute to the family. Besides parents taking care of their children, how can everyone else contribute to the family?

Come and play hopscotch to explore the situations of different alien friends!

When I injured my foot earlier, my family took great care of me. I personally thanked my mom.

Sometimes I do housework with my family, and cleaning my toys is what I'm best at!

I love eating snacks, but I always remember to throw the leftovers into the trash after eating.

I'm very responsible. Whenever I visit different planets, I always let my family know to prevent them from worrying.

When my family is cooking in the kitchen, I help by watching over my younger sister and play with her.
